Subject index

Acetate buffer
Periodic current oscillations in the anodic dissolution of copper in acetate buffer (Dewald et al.) 297
Acetonitrile
The application of rapid scan cyclic voltammetry and digital simulation to the study of the mechanism of diphenylamine oxidation, radical cation dimerization, and polymerization in acetonitrile (Yang, Bard) 87
Activation enthalpy
Potential dependence of the enthalpy of activation for the electroreduction of Pb(II) in dimethylformamide (Fawcett, Yee) 271
Adsorption potentiometry
Investigations on adsorption potentiometry. Part 2. Theory of derivative adsorption chronopotentiometry for a reversible reaction (Wenrui Jin, Junying Wang) 31
Adsorption voltammetry
On the adsorption voltammetry of indium(III) in the presence of oxine (Changlin Sun et al.) 251
Anion solvation
Solvation potentials and anion solvation in methanol + water mixtures (Hodges et al.) 55
Aromatic halides
Mechanism of nickel-catalysed electron transfer activation of aromatic halides. Part 1. Biphenyl electrosynthesis from bromobenzene (Amatore et al.) 125
Mechanism of nickel-catalysed electron transfer activation of aromatic halides. Part 2. Electrocarboxylation of bromobenzene (Amatore, Jutand) 141

Binary solvent mixtures
Ion-coupled transport of solvent in a binary solvent mixture. A new source of thermodynamic data (Hodges et al.) 41

Biphenyl
Mechanism of nickel-catalysed electron transfer activation of aromatic halides. Part 1. Biphenyl electrosynthesis from bromobenzene (Amatore et al.) 125
Bromobenzene
Mechanism of nickel-catalysed electron transfer activation of aromatic halides. Part 1. Biphenyl electrosynthesis from bromobenzene (Amatore et al.) 125
Mechanism of nickel-catalysed electron transfer activation of aromatic halides. Part 2. Electrocarboxylation of bromobenzene (Amatore, Jutand) 141

Calorimetry
Calorimetric observation of heat production during the electrolysis of 0.1 M LiOD + D_2O solution (Yung et al.) 279
Carbon monoxide
Electronic transitions of carbon monoxide chemisorbed on a gold electrode in 1 M NaOH (Caram, Guttiérrez) 301
Carboxylation
Mechanism of nickel-catalysed electron transfer activation of aromatic halides. Part 2. Electrocarboxylation of bromobenzene (Amatore, Jutand) 141
Chromium
An interesting adsorption phenomenon during the reduction of chromium(VI) ions on gold (Horányi) 287
Chronopotentiometry
Investigations on adsorption potentiometry. Part 2. Theory of derivative adsorption chronopotentiometry for a reversible reaction (Wenrui Jin, Junying Wang) 31
Coherent interferometry
Coherent interferometric analysis of the molecular orientation based on the study of the optical second harmonic generation (Sato et al.) 291

Copper
Periodic current oscillations in the anodic dissolution of copper in acetate buffer (Dewald et al.) 297
Cyanide
The effects of cyanide on the electrochemical properties of transition metal macrocycles for oxygen reduction in alkaline solutions (Gupta et al.) 239
Cyclic voltammetry
The application of rapid scan cyclic voltammetry and digital simulation to the study of the mechanism of diphenylamine oxidation, radical cation dimerization, and polymerization in acetonitrile (Yang, Bard) 87

Debye solvents
Solvent effects on simple electron transfer reactions. A comparison of results in Debye and non-Debye solvents (Fawcett, Foss Jr.) 71
Diffusion limiting currents
The theory of hidden diffusion limiting currents (Kharkats, Sokirko) 1
Digital simulation
The application of rapid scan cyclic voltammetry and digital simulation to the study of the mechanism of diphenylamine oxidation, radical cation dimerization, and polymerization in acetonitrile (Yang, Bard) 87
Dimethylformamide
Potential dependence of the enthalpy of activation for the electroreduction of Pb(II) in dimethylformamide (Fawcett, Yee) 271
Diphenylamine
The application of rapid scan cyclic voltammetry and digital simulation to the study of the mechanism of diphenylamine oxidation, radical cation dimerization, and polymerization in acetonitrile (Yang, Bard) 87

Electron transfer
Mechanism of nickel-catalysed electron transfer activation of aromatic halides. Part 2. Electrocarboxylation of bromobenzene (Amatore, Jutand) 141
Solvent effects on simple electron transfer reactions. A comparison of results in Debye and non-Debye solvents (Fawcett, Foss Jr.) 71

Gold
The effects of trace anions on the voltammetry of single crystal gold surfaces (Cahan et al.) 213
In-situ spectroelectrochemistry of adsorbed methylene blue on a sulphur-modified gold electrode (Lezna et al.) 259
An interesting adsorption phenomenon during the reduction of chromium(VI) ions on gold (Horányi) 287
Electronic transitions of carbon monoxide chemisorbed on a gold electrode in 1 M NaOH (Caram, Guttiérrez) 301

Heavy water
Calorimetric observation of heat production during the electrolysis of 0.1 M LiOD + D_2O solution (Yung et al.) 279
Heterocyclic conducting polymers
The use of microelectrodes to probe the electropolymerization mechanism of heterocyclic conducting polymers (John, Wallace) 157

Indium
On the adsorption voltammetry of indium(III) in the presence of oxine (Changlin Sun et al. 251
Ion-coupled transport
Ion-coupled transport of solvent in a binary solvent mixture. A new source of thermodynamic data (Hodges et al.) 41

Kinetics
Kinetics of reduction of adsorbed reactants in normal pulse voltammetry (Seralathan et al.) 195

Lead
Potential dependence of the enthalpy of activation for the electroreduction of Pb(II) in dimethylformamide (Fawcett, Yee) 271
Lead dioxide
Detection of soluble intermediates during deposition and reduction of lead dioxide (Campbell, Peter) 185
Lithium deuteroxide
Calorimetric observation of heat production during the electrolysis of 0.1 M LiOD + D_2O solution (Yung et al.) 279

Mercury film electrode
The effects of mercury film electrode morphology on square wave voltammetric peak current response as a function of frequency (Kounaves, Deng) 111
Methanol
Solvation potentials and anion solvation in methanol + water mixtures (Hodges et al.) 55
Methylene blue
In-situ spectroelectrochemistry of adsorbed methylene blue on a sulphur-modified gold electrode (Lezna et al.) 259
Microelectrodes
The use of microelectrodes to probe the electropolymerization mechanism of heterocyclic conducting polymers (John, Wallace) 157

Nickel
Mechanism of nickel-catalysed electron transfer activation of aromatic halides. Part 1. Biphenyl electrosynthesis from bromobenzene (Amatore et al.) 125
Mechanism of nickel-catalysed electron transfer activation of aromatic halides. Part 2. Electrocarboxylation of bromobenzene (Amatore, Jutand) 141
Non-Debye solvents
Solvent effects on simple electron transfer reactions. A comparison of results in Debye and non-Debye solvents (Fawcett, Foss Jr.) 71
Normal pulse voltammetry
Kinetics of reduction of adsorbed reactants in normal pulse voltammetry (Seralathan et al.) 195

Organic compounds
The redox-catalysed reduction of dispersed organic compounds. Investigations on the electrochemical reduction of insoluble organic compounds in aqueous systems (Bechtold et al.) 169
Oscillating current
Periodic current oscillations in the anodic dissolution of copper in acetate buffer (Dewald et al.) 297
Oxines
On the adsorption voltammetry of indium(III) in the presence of oxine (Changlin Sun et al.) 251

Polarization
The origin of the polarization catastrophe: the improper choice of the independent electrical variable (Nikitas) 13

Radical cation dimerization
The application of rapid scan cyclic voltammetry and digital simulation to the study of the mechanism of diphenylamine oxidation, radical cation dimerization, and polymerization in acetonitrile (Yang, Bard) 87
Rapid scan cyclic voltammetry
The application of rapid scan cyclic voltammetry and digital simulation to the study of the mechanism of diphenylamine oxidation, radical cation dimerization, and polymerization in acetonitrile (Yang, Bard) 87
Redox-catalysed reduction
The redox-catalysed reduction of dispersed organic compounds. Investigations on the electrochemical reduction of insoluble organic compounds in aqueous systems (Bechtold et al.) 169

Second harmonic generation
Coherent interferometric analysis of the molecular orientation based on the study of the optical second harmonic generation (Sato et al.) 291
SHG
Coherent interferometric analysis of the molecular orientation based on the study of the optical second harmonic generation (Sato et al.) 291
Soluble intermediates
Detection of soluble intermediates during deposition and reduction of lead dioxide (Campbell, Peter) 185
Solvation potentials
Solvation potentials and anion solvation in methanol + water mixtures (Hodges et al.) 55
Solvent effects
Solvent effects on simple electron transfer reactions. A comparison of results in Debye and non-Debye solvents (Fawcett, Foss Jr.) 71
Spectroelectrochemistry
In-situ spectroelectrochemistry of adsorbed methylene blue on a sulphur-modified gold electrode (Lezna et al.) 259

Square wave voltammetry
The effects of mercury film electrode morphology on square wave voltammetric peak current response as a function of frequency (Kounaves, Deng) 111
Sulphur
In-situ spectroelectrochemistry of adsorbed methylene blue on a sulphur-modified gold electrode (Lezna et al.) 259

Trace anions
The effects of trace anions on the voltammetry of single crystal gold surfaces (Cahan et al.) 213
Transition metal macrocycles
The effects of cyanide on the electrochemical properties of transition metal macrocycles for oxygen reduction in alkaline solutions (Gupta et al.) 239

Voltammetry
The effects of trace anions on the voltammetry of single crystal gold surfaces (Cahan et al.) 213
